

ACADEMIC PROGRESS REPORT-THIRD YEAR (FIRST SEMESTER REPORT)

Name: Havor Seyram Abednego
Program: BSc. Medical Laboratory Sciences
Institution: University of Health and Allied Sciences
Year: Three
Semester: First Semester
GPA: 3.3 (Good)

Dear Mr. Adjordor Edem & GNAP Sponsors

This report aims to update you on my academic progress for the first semester of my third year in the BSc. Medical Laboratory Science. I hope this report finds you well.

ACADEMIC PROGRESS

These were the courses I completed the in the first semester of my third year;

Histopathology Diagnostic Technique (Theory & Practicals)

Chemical Pathology and Homeostasis (Theory & Practicals)

Basic Haemopathology: The Anaemias (Theory & Practicals)

Medical Mycology (Theory & Practicals)

Pharmacology

Entrepreneurship

Research Methods

These courses have deepened my knowledge and understanding across some major areas of Medical Laboratory Science.

This comprehensive coursework has equipped me with skills in histopathology and diagnostic techniques for precise cellular-level disease identification. This included practical experience in tissue processing, microscopic examination, and advanced diagnostic methods. I also gained a solid understanding of biochemical processes and blood disorders, which is needed for diagnosis and effective patient management. My studies in medical mycology and pharmacology gave me specialized knowledge in fungal infections and how drug mechanisms relate to diagnostic tests.

Every moment I spent in these enriching courses was a profound journey of discovery and personal growth, solidifying my passion for Medical Laboratory Science.

EXTRACURRICULAR ACTIVITIES

Through clinical rotations, I gained hands-on experience across three main healthcare facilities within the Ho municipality: Ho Teaching Hospital, Ho Municipal Hospital, and Ho Polyclinic. This practical experience has really helped a lot.

In addition to my coursework, I also took part in the Medical Laboratory Science Students Association "MELSA" programs. Through workshops, seminars, and strips, I have continued to develop my practical skills and expand my connections.

ACKNOWLEDGEMENT AND OUTLOOK

I am truly grateful for your financial assistance. Your support has truly allowed me to dedicate myself to my studies and strive for academic excellence. With the second semester of my third year in progress, I am determined to reach my academic goals and make a positive impact in my field. Again, I am very thankful for all the supports financially and mentally.
